

MODEL N°
BOLSTER CHAIR

Our penchant for parametric architecture, modernist sculpture and sustainable design peaks in the Bolster Chair. A feat of circularity and net zero manufacturing, we make Bolster in one continuous and wasteless 3D print using our own resins upcycled from plant waste. Durable and biodegradable, the Bolster handles conditions inside and out without pause, fully biodegrades or recycles without losing mechanical integrity at the end of life. Spec the chair in multiple colors and sustainable fabrics for the lumbar cushion.

dimensions

width	24"
height	28"
depth	30.25"

materials

Bio Resin	Black, White, Woodprint, Desert Clay, Seaglass, Fern
Indoor Fabric	Wood Ash, Smoke, Flannel Grey, Charcol Grey, Driftwood, Mercury Glass, Parrotet, Waterslide, Bosky, Tweed, Sparrow, Cattail
Outdoor Fabric	Heritage-Ashe, Heritage-Papyrus, Heritage-Leaf, Heritage-Rust, Heritage-Sky, Heritage-Slate

care

Care for plant resin 3D printed components: Keep the edges of your resin surfaces clean by using a synthetic bristle brush with mild cleaning soaps, such as diluted dish soap or general non-abrasive cleaners. Avoid bleach, ammonia, and other harsh or abrasive cleaners which may damage the texture of the surface.

Avoid letting water stand on the surfaces of the cushions. Cushions and Bio Resin Body should be covered whenever possible. We suggest removing the cushions if covering the sofa for more than 3 days.

sustainability

From FSC® certified hardwoods, to plant-based polymers, to GOLS-certified latex, we examine every product for sustainability, quality, and performance. We strive to source our materials locally. Additive manufacturing processes like 3D printing let us produce each piece to order. Limiting inventory minimizes our carbon footprint and also maximizes our product quality. Only the products identified as such in this document are FSC®-certified. FSC® C125400/SCS-COC-007184
