MONITOR STAND

ZENITH MONITOR STAND

MODEL N°

If the pandemic taught us one thing, it's how to organize a work space. We'll admit. We sat on the sidelines in full denial. We used old boxes, books and whatever was in arms reach. Frustrated, we admitted we have to do this better.

Enter the Zenith Series. Fit to stand up most monitors, we 3D print the Zenith Monitor Stand with resins upcycled from plant waste. We fabricate and hand-finish the removable wood tray from FSC® certified or salvaged hardwoods. Every piece in the Zenith Series is recyclable and biodegradable at end of life. Spec any piece from the Zenith Series from multiple hardwoods and bio-resins colors. Add the Zenith Headset stand and the Zenith Riser to complete the scene.

materials

Wood Species Walnut, Ash, Charcol Ash, White Oak, Beech, Salvage Elm, Cherry

Bio Resin Black, White, Woodprint, Desert Clay, Seaglass, Fern

care

Care for plant resin 3D printed components: Keep the edges of your resin surfaces clean by using a synthetic bristle brush with mild cleaning soaps, such as diluted dish soap or general non-abrasive cleaners. Avoid bleach, ammonia, and other harsh or abrasive cleaners which may damage the texture of the surface.

Our hardwood surfaces are finished with an environmentally friendly, plant based, hard wax oil wood finish that has 0% VOC and does not contain any water or solvents. It is protective and durable. Wipe with a damp cloth and gentle cleanser. Avoid water marks by quickly wiping up any standing liquids on the chair. Never use harsh cleaning sprays or abrasives on your wood surfaces. Clean any sticky spots gently with soap or mild detergent and water.

sustainability

From FSC® certified hardwoods, to plant-based polymers, to GOLS-certified latex, we examine every product for sustainability, quality, and performance. We strive to source our materials locally. Additive manufacturing processes like 3D printing let us produce each piece to order. Limiting inventory minimizes our carbon footprint and also maximizes our product quality. Only the products identified as such in this document are FSC®-certified. FSC® C125400/SCS-COC-007184

customization

With the use of our advanced manufacturing processes, our customers have the freedom to customize their order. From sizing, material choice, fabric color and finish, we can truly design your living space to the customers ideal vision. There is no minimum order quantity as we are aiming to reach a diverse range of customers, from big companies to small homes.
